

MEHUL SHARMA

+91 9784765335 — mehulbohral1@gmail.com — linkedin.com/in/mehul-sharma — github.com/Mehul112004

Professional Summary

Full Stack Developer with 2+ years of experience building scalable cross-platform applications using React Native and React.js. Proven track record of shipping production systems serving 15,000–17,000+ monthly active users, with expertise in CI/CD pipelines, cloud infrastructure (AWS, Firebase, GCP), payment gateway integration, and system design. B.Tech graduate (May 2026) from SKIT Jaipur.

Education

Swami Keshvanand Institute Of Technology Management And Gramothan

May 2026

B.Tech — CGPA: 8.48

Jaipur, Rajasthan

Sunder Public School

2021

Senior High School — Percentage: 96%

Jaipur, Rajasthan

Work Experience

GoHappy Club

Jul 2024 – Present

Full Stack Developer

- Orchestrated the architectural overhaul of a React Native application scaling to 17,000+ MAU and 55,000+ total downloads across the Play Store and App Store, migrating to Expo with OTA updates via Revopush and deploying remote config feature flags.
- Architected a comprehensive React.js-based Admin Dashboard utilized by the operations team to manage events and trips, monitor real-time user registrations, track referral metrics, and reconcile financial transactions.
- Engineered a resilient multi-gateway payment system (PhonePe, Paytring) handling complex auto-pay mandate flows, recurring subscriptions, and virtual wallets to enable direct platform monetization.
- Automated operational CRON pipelines for subscription lifecycles and inactive user reminder notifications; implemented CI/CD pipelines via GitHub Actions, Firebase Cloud Messaging (FCM) for user app-deletion tracking on AWS Lambda, integrated Sendgrid/Zoom SDKs, and built a React web portal to bypass app store commissions.

Dr. UPSC (EdTech Company)

May 2024 – Jan 2025

Frontend Developer

- Designed and developed a secure e-learning platform from scratch, scaling to 15,000+ monthly active users as the founding technical hire; deployed and managed application infrastructure on Firebase and GCP App Engine.
- Integrated a configurable multi-gateway payment routing system (PhonePe, Cashfree, Razorpay) and deployed Clevertap and Google Ads tracking to optimize user acquisition funnels and debug conversion telemetry; added HLS streaming support and native PDF renderers.

Projects

MayaX – AI-Driven Interior Design Ecosystem

React Native, Flask, PyTorch, Computer Vision

- Built a cross-platform interior design system using React Native, Expo, and Flask, engineering a generative ML and Computer Vision pipeline for real-time spatial analysis and high-fidelity style transfers.
- Developed a contextual recommendation engine that maps AI-generated layouts to purchasable affiliate items, creating a seamless visualization-to-action monetization funnel.

C_Helper – Crypto Signal Intelligence Platform

Python, Flask, React, TypeScript, PostgreSQL/TimescaleDB, Docker, LLM APIs

- Architected a full-stack crypto signal intelligence platform from scratch, covering a 9-phase build pipeline spanning real-time data ingestion, multi-timeframe technical analysis, LLM confirmation, backtesting, and live charting for BTC, ETH, SOL, and XRP.
- Developed an LLM confirmation pipeline feeding a 6-dimension structured context (market structure, indicators, HTF context, price action) to a pluggable OpenAI-compatible provider (LM Studio / OpenRouter), with pydantic-validated verdicts and full prompt/response audit logging.
- Implemented a full backtesting engine computing win rate, Sharpe/Sortino ratios, max drawdown, and equity curves with realistic next-bar-open entry and same-bar conflict resolution; iteratively improved SMC liquidity sweep strategy to 45% win rate at 2.3 RR.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++

Frameworks: React Native, React.js, Next.js, Spring Boot, Flask, Expo

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP App Engine, Firebase, Docker, CI/CD Pipelines (GitHub Actions), Serverless Architecture, API Security

Libraries & AI Tooling: Redux Toolkit, LangChain, OpenAI API, NumPy, PyTorch

Databases: PostgreSQL, MongoDB, Firestore, MySQL, Redis

Developer Tools: Git, GitHub, VS Code, Postman, Figma, EAS

Core Concepts: Data Structures & Algorithms, System Design, OOP, DBMS, REST APIs, Operating Systems, Agile Development, Debugging & Testing
